

How does childcare work in The Netherlands?

In the Netherlands, families have different care options for their child(ren). For example: daycare, childminder or informal care such as grandparents or other relatives. Nemo offers daycare for children between 0-4 years old.

Childcare is not a social service in the Netherlands; therefore, we are unable to guarantee places for children. Even though we would really like to! You may be eligible for childcare allowance, which is a contribution you receive from the government towards the cost of childcare.

Am I eligible for childcare allowance?

With our calculation tool you can easily see what your actual monthly costs will be for our daycare or after school care. Fill in your situation and we will calculate the net costs of the chosen childcare.

Monitoring the development of your child at the Consultation Centre

A consultation centre (CB) is an organisation that monitors your child's health, development and growth. In the region of Eindhoven it's called GGD Brabant Zuid-Oost. At the GGD you get free advice and medical care for your child here. From birth until your child is 4 years old, you will make regular visits to the clinic. This is also where he gets his vaccinations and where you can ask any questions or express any doubts you may have.
